“Opportunities Appear”

6PM CALL

Market today: Opportunities Appear

(Quang Vo – Ext: 1517)

Although there was no negative news, the majority of stocks closed below their reference prices. The number of gainers on the HSX was a half lower than the number of losers, while the VN-30 even witnessed a worse performance as there were only 2 stocks ending in green. The strong outflows could also be seen in middle and small cap stocks, especially in speculation ones such as HQC, NVT, SGT and LDG. The VN-Index fell by 1% to 738.21.

Unreasonable falls in the market often open up opportunities for investing in strong-fundamental stocks, which have dominant positions in the market and solid financial strength. We believe that FPT is such an opportunity at the moment. Under profit taking pressure at the end of today’s session, FPT slightly increased 0.9%. Therefore, the room for the stock’s prices to increase is full of promise. Notably, there is a rumor that FPT will sell its Retail segment with a P/E of 15. Considering the segment’s projected PAT will be VND326 billion and FPT owns 85% of FPT Retail, FPT prices may increase by VND7,800/share due to this extraordinary profit. RongViet Research did not factor in this profit in our report. Investors can find more information in [FPT - The Restructuring Progress Remains a Long-term Story Report](#).

Overall, the VN-Index was facing a strong resistance between 747 and 750. Considering no significantly negative news, the oversold can disappear in upcoming sessions.
